**Subject:** heroin OD's FYI

---

FYI Julie and Chuck,

I have spoken to a Sgt. Thomas Joyce again this morning about the recent rash of heroin OD's they have seen in the city over the last 7-8 days. He had inquired about our observations of heroin samples recently and if there had been unusual findings that we had seen. Word on the street was that the heroin had been cut with ketamine. Since we are 2-3 months behind in analyzing routine samples we did not have recent data.

Subsequently last Friday I pulled about 8 recent Boston heroin samples and assigned them to Annie. When I spoke to Sgt. Joyce today he said they had heard that possibly the heroin was being cut with fentanyl. He does not have any heroin seized that is directly related to an OD as of yet. As heroin samples come in this week from Boston I will pull them and assign them to Annie as well and we will see if there is anything unusual.

Betsy
